**2**

Plug the other end of the Ethernet cable into your port 1 on your Openreach modem.

**3**

# Connecting to Openreach modem - FTTP

# Connecting to Openreach modem - G.Fast

**1**

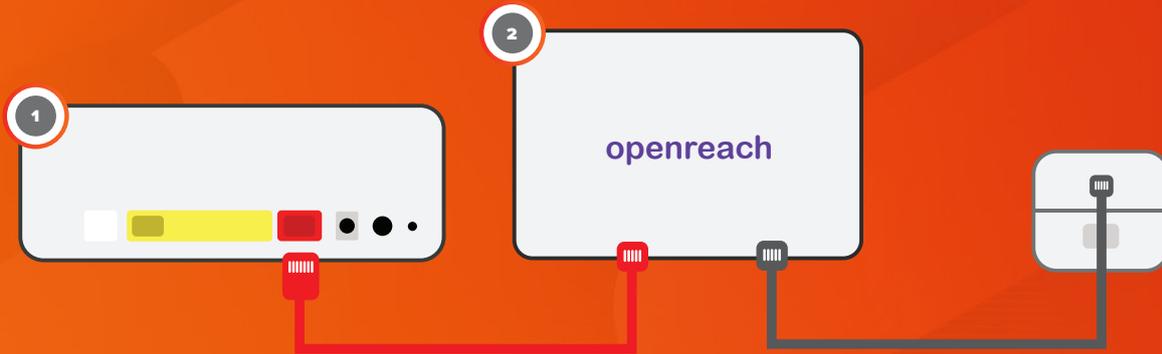

Plug the Ethernet cable with the red connectors into the red port labelled WAN.

**2**

Plug the other end of the Ethernet cable into your port 1 on your Openreach modem.

**5**

# Connecting to Openreach modem - G.Fast

# Connecting wirelessly

1

**Find your routers Network name** / SSID and wireless key (located on the sticker on the base of your router)

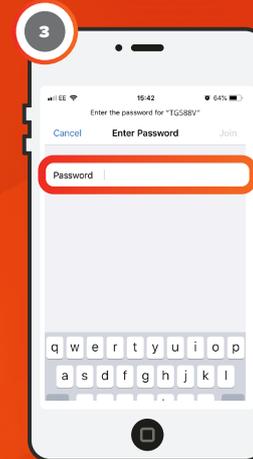

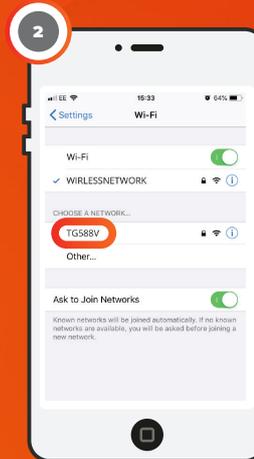

2

**Search for available** wireless networks on your chosen device and select the one that matches the Network Name / SSID

3

When prompted for the password, **input the wireless key** into your chosen device and connect.

# Connecting wirelessly

# Connecting via cable

1

**Connect one end of the Ethernet cable** (the one with the yellow ends) to one of the yellow ports in the back of your router

2

**Then connect the other end** of this cable into the Ethernet Port on your chosen device (e.g. Desktop PC)

## Connecting via cable
